Cerbera Parts Catalogue

Introduction

This Parts Catalogue has been compiled for the **TVR Engineering** models - **Griffith & Chimaera**
Any modifications that do occur to the production car will be reflected in additional pages being sent out.
The aim of this Parts Catalogue is assist skilled **TVR technicians** in the efficient repair and maintenance of any TVR Griffith & Chimaera.

TVR do not accept any responsibility for any inaccuracies, errors or omissions contained within this manual, although every effort has been taken to make it as complete and accurate as possible. TVR do not accept any liability for any consequential or other losses howsoever arising as a result of any of the recommendations contained within this manual.
All repairs to the TVR - Griffith & Chimaera should be carried out by a TVR Dealer. Repairs should never be attempted by untrained individuals.

Interpretation of Spare Parts Catalogue

This manual is divided into sections as shown on the contents page. To locate a part refer to the contents page to establish the section reference number. If the designation of the part is not known it may be identified by reference to the relevant illustration. The illustration numbers are listed in numerical order in the tabulated list. Part number, description, and number per car can be ordered by reading across the list.
Usage will quickly make the user familiar with the manual layout and no problem should be encountered locating any part number.

How to Order

In order to avoid delay the following information should be read carefully and the instructions followed to ensure that the factory, importer or dealer receives sufficient information, in the approved form, to enable speedy dispatch of the correct parts.

Orders for parts should be forwarded separately and not with correspondence dealing with other matters.
The chassis number, vehicle identification number and engine number, including all letter prefix and suffixes of the car concerned must be quoted on every order. This information is given on the identification plate on the wheelarch of the vehicle and on the engine cylinder block.
The full part number and description of the parts must always be given and, if any doubt exists, a sketch or pattern should be forwarded with the order.
Specialist and other non - standard equipment which is not listed in this catalogue may be ordered on a separate order form giving full details.
The offical order form should always be used and can be faxed direct to our Parts Department on:-

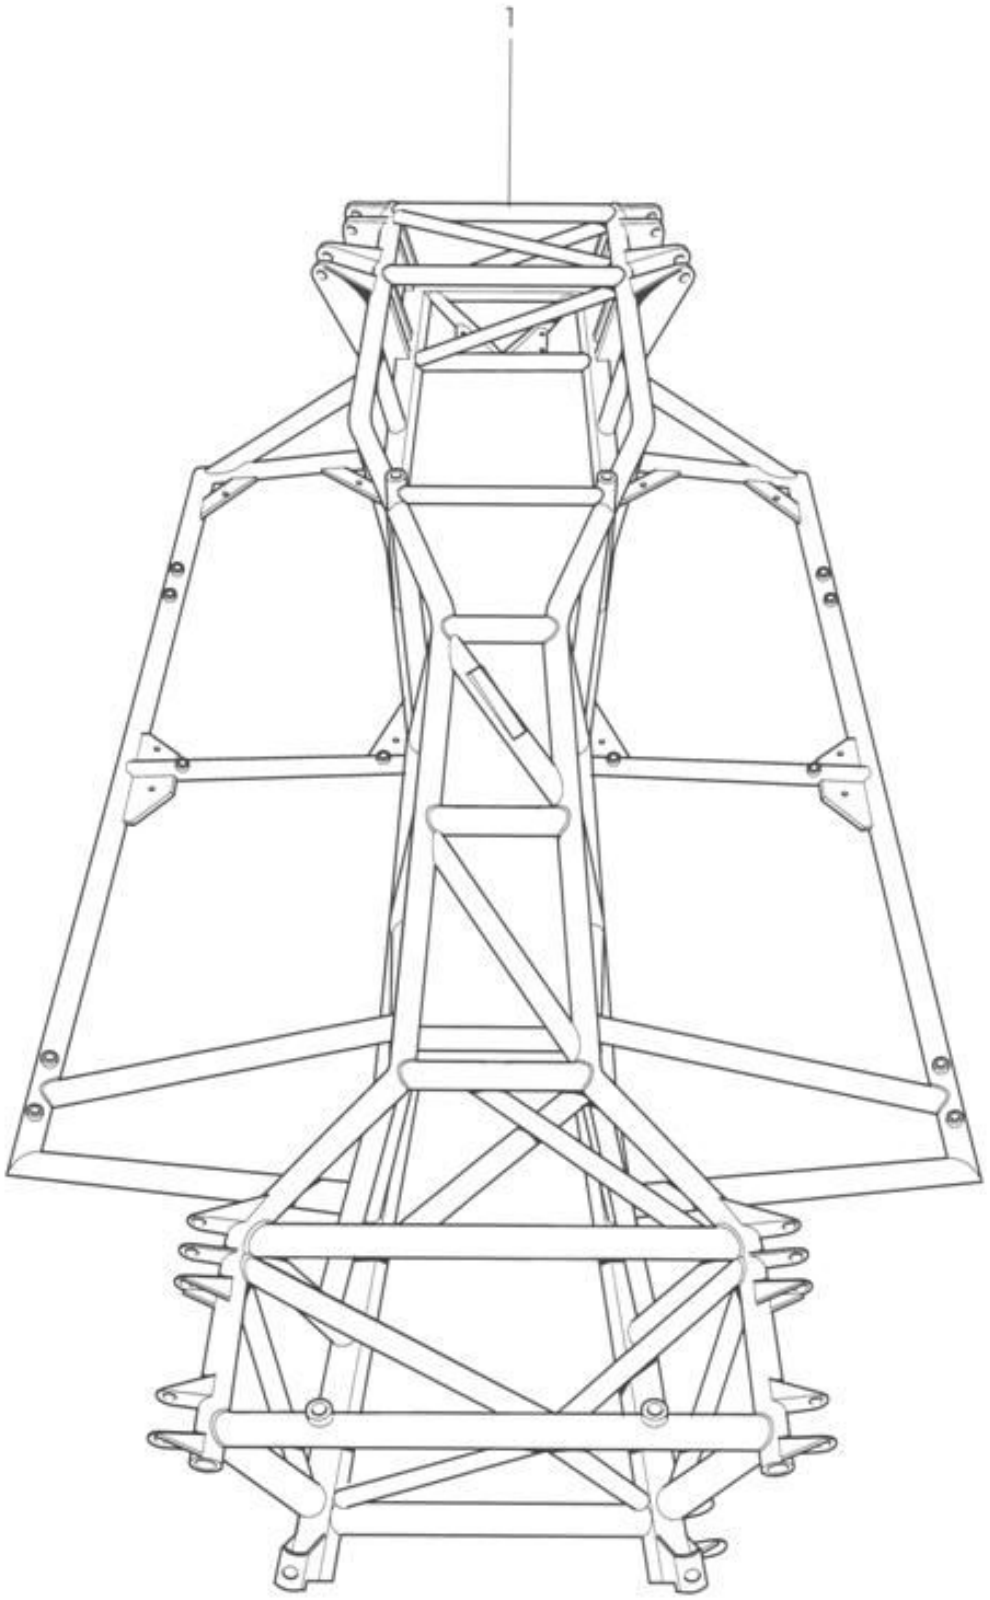

Fax: 01253 509060

Special Note

As pipe and hose lengths may vary from time to time due to variations in production build, please state length required in addition to the part number in order that we may supply the correct item.
Always specify the dispatch method required e.g. Air freight, Airmail, sea, post, passenger train etc.
Confirmation orders must be clearly marked to avoid duplication.
Crates and packing cases used for dispatch goods will be charged for and credited in full if returned undamaged within one month.Damaged and broken parts sent as patterns will not be returned unless specially requested.
This manual has been collated as accrutely as possible however if any mistakes have been made which have somehow missed our attention please inform somebody in our spares department whilst order parts who will be able to rectify and advise you on the parts required. As the development of the TVR range of cars is on going parts are frequently being modified. These parts will then be included into this catalogue and so it will be updated on a regular basis.
